

ARCHIVING EVENTS

Save on Hard Drive and CDs

Please use CD-R 80 Min 700 Mb

Make sure you archive an event first on HDD then on CDs. A CD can get scratched while HDD is safer.

1. Click on **SEARCH** tab
2. Click on calendar date you're interested to play back (has to be in BOLD)
3. Click on time you want the recording to start from (red bar indicator)
4. Click on the camera you want to record from (a green highlight will appear around the box)
5. Click on **SAVE**
6. Click **OK** on AVI format
7. Click on **START**
8. Type a File Name to identify the event using on-screen keyboard -upper right side corner
9. click **ENTER** or **SAVE**
10. Click on **STOP** when you want the movie clip to end
11. Click **EXIT**
12. Click ON-SCREEN keyboard located at the top right corner of screen. Click on **START** button left corner
13. Click on Documents
14. Click on My Documents
15. To view Movie double click on Video Clip from the screen. Then NEXT, NEXT, FINISH. Now the Movie is Playing.
16. To Burn Video Clip right click on the movie you want to Burn.
17. Click on **SEND TO** and then choose one of the options ex: CD-R Drive(F:) - make sure you put the CD into the DVR
18. Click on "You have Files waiting to be written to the CD"
19. Click on "Write These Files to CD"
20. Click on **NEXT, NEXT**
21. Click on FINISH and the CD will pop out the CD Drive.

Note: your event (movie clip) is now in the hard disk drive and can be played or burned on a CD, memory stick or card flash. To get back to LIVE screen Click CONTROL tab.

To see or copy this movie you have to follow the next procedure:
